

RS Vision

With sparkling performance the Vision is stable, spacious and fun. Complete beginner to club racing - the Vision is the boat of choice for countless clubs and families worldwide.

Designed for work, rest and play

The Vision is chosen time and time again by families, training centres and National programs - It's a novice trainer that can add excitement with the spinnaker and trapeze. This versatility is what makes it a best-seller across the world.

Space for everyone

The spacious, uncluttered cockpit has inner seating, built in storage and the compression kicker above the boom gives extra room for the crew to move around safely. There are no hard edges or angles making it very safe.

Novice to advanced in no time

Beginners will find it easy to sail due to the wide waterline beam and minimal topside flare giving greater stability. When a bit more excitement is needed, that stability will make learning the advanced skills of spinnaker

sailing and trapezing more achievable. The spinnaker chute is the whole bow area, so hoists and drops are quick and easy. The Vision is forgiving, yet has the best handling of its type, and so will satisfy the most discerning of sailors! Perfect when you want to go on a family sail-away one day and go flat-out racing the next.

Safe in all conditions

The Vision is easily righted from capsize, with the self draining cockpit and built in righting lines assisting quick and safe recovery. Mast head floats can be added for peace of mind.

It's light enough to be handled by one adult, and has a furling jib and pivoting foils making short work of getting on and off the beach for lunch - Great for parents or instructors with safety in mind, especially with youngsters who can't help.

In windy conditions it can be de-powered quickly with the effective mainsail controls. If you get caught out the Vision can be easily reefed in seconds due to the RS One-line Reefing System that is pre-rigged before you set off.

Taking the rough with the smooth

The tough RS Comptec PE3 construction means the Vision is stiff, very strong and virtually maintenance free. The strongest fittings are used too. It can even be dragged up the beach for lunch!

RS
Vision

The average size family who are looking for indestructible fun in a lightweight dinghy which can be raced and cruised should look no further than the RS Vision.

Dinghy Sailing Magazine

More than 25 instructors and 6 RYA Coach Assessors got the chance to sail in the Visions and all of them loved it.

Nick Wymer Plas Menai National Water-sports Centre

The boat was great, I used it almost every day, sailing, with out board, even caught mackerel in it. I sailed to Falmouth one day on my own. I can thoroughly recommend it.
