

RS venture

Taking up to 8 crew, this cruiser/trainer is the ultimate in modern luxurious sailing. Stylish lines and practical features it's the favourite for families, training centres and day trippers.

Have an Ad-Venture!

With a huge amount of space and seating, gripped flat decks, loads of storage and amazing stability it's the perfect boat for training, day sailing and even club racing. Whichever, the RS Venture was made for your adventures.

Beautiful handling & luxurious comfort

The Venture has the handling finesse that is expected of an RS, combined with practicality and safety. The mainsail can be de-powered in an instant with our innovative RS One Line Reefing System giving complete control in any conditions. With a choice of either symmetric or asymmetric spinnakers and a trapeze it can cater for all levels of training and sailing.

The huge cockpit and lots of inner seating will comfortably carry up to eight sailors! The floor is gripped and flat and the strut kicker

above the high boom means even less able or experienced bodies can move around safely.

With a furling jib, pivoting foils and stable hull, the Venture is easy to launch and recover, despite its size. These ease-of-use features have made it an award-winner and family favourite across the world already.

Safe, fun and easy to sail

The Venture's stable design can be complimented by standard or ballasted centreboard versions – And either one can sit happily on a mooring. The hull is so stable - Both versions are difficult to tip over! However if it does capsize, it's slow to invert and with the optional mast head the RS Venture is easily righted from capsize. It has a self draining cockpit and built in righting lines assisting quick and safe recovery.

Long lasting value

The build quality is second to none with the Venture built using an exceptionally durable GRP composite hull construction that will last for years.

Minimum maintenance is required and optional gunwale fendering and aluminium keel-band protect from the bumps and grinds the Venture may be faced with on adventures.

There are loads of options with the Venture, from a ballasted centreboard and storage to anchor and trapeze sets - You can make the Venture perfect for you.
